

ARE YOU BUYING THE RIGHT SKI EQUIPMENT?

Does your ski equipment complement your skiing style and ability? Equipment that is matched properly to you is important in giving you the best experience. Ski Tunes staff has often seen equipment mismatched to someone's ability on the slope. For example, our concerns include the following:

- ski length and width
- ski type
- ski performance level
- ski boot fit and flex

Ski Tunes can sort out all of these issues so your equipment best fits your ability and goals.
